

Job Description for Senior Consultant, Analytics Services – Services and Solutions

Job Status: Exempt, Full Time

Reports to: Vice President, Services and Solutions

The Company

Gray Matter Analytics is a rapidly growing early-stage company headquartered in Chicago, with offices in New York. Gray Matter Analytics Value-Based Care (VBC) Analytics Solutions provide value in three distinct ways.

- We partner with customers to deliver tailored solutions to optimize value-based care performance through our advisory and implementation services.
- We leverage a catalog of measure calculations and advanced analytic models, together with predictive insights to accelerate value through our business solution accelerators.
- Our solutions are delivered using our cloud-native, highly configurable CoreTechs® engine.

We transform healthcare organizations into data and insights-driven enterprises. We bring the right insights to the right stakeholder at the right time to improve decision making and outcomes, and lower cost, improve quality and enhance VBC performance.

Essential Job Functions

- Engagement Contribution
 - Develop detailed, measurable analysis with meaningful insights
 - Communicate effectively and concisely, verbally and in writing, with clients and with all levels of the company to successfully accomplish objectives
- Service Delivery:
 - Support efforts to assess, capture and translate complex business issues and requirements structured into analytics use case, including rapid learning of industry/domain/client dynamics and management of effective work stream plans, models and visualizations.
 - Support analytics efforts to define enterprise data strategy, operating model, governance, infrastructure, architecture and implementation planning with a focus on data quality and data management in the delivery of advanced analytics capabilities

Qualifications & Desired Skills

- A minimum of two years of healthcare consulting experience with a demonstrated knowledge of medical claims and associated data structures
- Experience performing analysis on large datasets within a healthcare engagement
- Proficiency in one of: SQL, Python, or R (or similar)
- Familiarity with Jupyter Notebooks or DataBricks a plus

- Experience supporting data analytics initiatives which include strategy, governance, operating model, infrastructure, architecture and implementation planning – experience should include implementation and the achievement of significant improvements in data integrity and advance analytic capabilities.
- Demonstrated problem-solving, quantitative and qualitative analysis skills
- Strong critical thinking skills; ability to develop solutions that address client needs
- Knowledge of analytics techniques and tools, including manipulating and synthesizing data with a basic knowledge of data integration tools, knowledge of data mining techniques, and familiarity with statistical analysis, data visualization, and data cleansing tools and techniques
- Excellent verbal and written communication skills with a data-driven approach to solving complex challenges, including the ability to explain data concepts and technologies to both Business Operations and IT leaders
- Knowledge of consulting methodologies, tools and techniques
- Experience in key issues and current developments in the healthcare industries
