

Job Description for Data Analyst – Product

Job Status: Exempt, Full Time

Reports to: Manager Data Analytics

The Company

Gray Matter Analytics is a rapidly growing early-stage company headquartered in Chicago, with offices in New York. Gray Matter Analytics Value-Based Care (VBC) Analytics Solutions provide value in three distinct ways.

- We partner with customers to deliver tailored solutions to optimize value-based care performance through our advisory and implementation services.
- We leverage a catalog of measure calculations and advanced analytic models, together with predictive insights to accelerate value through our business solution accelerators.
- Our solutions are delivered using our cloud-native, highly configurable CoreTechs® engine.

We transform healthcare organizations into data and insights-driven enterprises. We bring the right insights to the right stakeholder at the right time to improve decision making and outcomes, and lower cost, improve quality and enhance VBC performance.

Primary Job Functions

The Data Analyst will be a member of the Product team reporting to the Manager Data Analytics. As a member of the team building the product and deploying it for our clients, the Data Analyst will serve as the subject matter expert for healthcare data, especially for the analytics and insights visualized in the CoreTechs® solutions.

Essential Job Functions

- Demonstrate Subject Matter Expertise for healthcare data and CoreTechs® standard data in Gray Matter Analytics
- Deliver health care data analytics insights that can be operationalized and configured into data pipelines that are consumed by the CoreTechs® product
- Develop data solutions using quality by construction principles
- Solve problems using critical thinking skills, clear blockers by balancing being resourceful and asking for help as well as employ a continuous improvement mindset
- Collaborate with product, data engineers, data scientists and other data analytics to achieve our product roadmap

Qualifications & Desired Skills

- Minimum of four years of experience in a data and analytics role in healthcare
- Proficiency querying and manipulating data using SQL and/or Python
- Understanding of healthcare data, including ICD-10 and HCPCS/CPT
- Knowledge of data management applications
- Proficiency in sifting through data to extract pertinent insights for interpretation and reporting
- Proficiency in identifying and addressing data quality issues
- Experience with healthcare measures and analytics

Gray Matter Analytics is an Equal Opportunity Employer. Gray Matter Analytics does not discriminate on the basis of race, religion, color, sex, gender identity, sexual orientation, age, non-disqualifying physical or mental disability, national origin, veteran status or any other basis covered by appropriate law. All employment is decided on the basis of qualifications, merit, and business need.
